

Statement in Response to Recent Decisions and Actions by the Presidential Administration

January 30, 2025

The Partnership for Southern Equity is closely monitoring the actions taken by the new administration, especially their pausing the disbursement of federal funds to nonprofits, grantees, local governments, and public agencies. We believe this egregious act has no Constitutional merit and hope the federal courts render an expeditious decision favoring those who have been harmed by this callous attempt at hoarding power. Now is the time to lean on the wisdom of our ancestors and harness our collective courage in opposition to people who stand antithetical to the ideals of this nation. The work continues and so will our vigilance.
